CUSTOM PROGRAMMING SOLUTIONS + SaaS

Cisco CCX Phone Wall-Boards for self hosted clients that shows agent's phone status in real-time. This allows clients to see their agents with color scheme statuses customized to their specifications.

TimeClock+ interface for self hosted clients that will show in real-time all employees that have time accumulated for the current work week. Shows employees approaching overtime in orange and red when they have reached it. Other time clock systems supported as long as the data is available. Visually track and reduce over time in real-time.

Check your billing department's performance showing daily claims using CPT, claim counts, dollars, insurance, etc. Customized to client's scope.

All these can be run from a computer with a web facing interface auto-refreshing to a TV or similar output device.

Custom solutions available. Email, text, or call us to get started.
